# ACUMATICA CLOUD ERP

# EXTENDED PROFILE

## OVERVIEW

Acumatica Cloud ERP delivers integrated business applications (financials, distribution/WMS, manufacturing, CRM, project accounting, and industry-specific modules) that share a single source of truth and real-time reporting.

It boasts modern workflows, industry-specific capabilities, and automation, with the 2025 R1 release adding enhanced connectivity, AI-driven automation, and improved customization options.

The platform supports open integration standards (contract-based REST and SOAP APIs, OData endpoints) so teams can build rapid integrations and custom endpoints with predictable contracts.

Developers and partners commonly use Acumatica's contract-based REST API and OData for read/write or read-only scenarios.

Licensing and pricing for Acumatica Cloud ERP follow a consumption- and functionality-based model (not per named user): costs are driven by the applications you license + reserved resource tiers/consumption rather than a per-seat fee.
