

JONAS CONSTRUCTION SOFTWARE

EXTENDED PROFILE

OVERVIEW

Jonas Construction Software is an integrated construction ERP built for contractors that need deep financial controls plus project and service management. The suite combines accounting, payroll, job cost, project scheduling, document management, and field tools into a single platform.

CORE FEATURES

- **Construction accounting and job cost:** General ledger, accounts payable/receivable, WIP, and cost reporting designed for construction financial workflows.
- **Payroll and labor costing:** Payroll posts directly to job cost and the general ledger, so payroll costs reflect in project financials.
- **Project management and scheduling:** Tools to create schedules, set milestones, and distribute schedules to crews.
- **Field and service management:** Mobile/field time capture, dispatch, and service ticketing that connect to office systems.
- **Document management and integrations:** Built-in document control and published integrations (for example, with [Procore](#)) to extend workflows.

DEPLOYMENT AND UPDATES

You can run Jonas on-premise or on Jonas Cloud. Jonas Cloud offers remote access, automatic updates and 24/7 monitoring with scalability that adjusts resources as needs grow.
